

Carbon Reduction Plan

ISHelp.co.uk Limited and its subsidiary GridSmart Limited

Publication date: 04 August 2023

Commitment to achieving Net Zero

ISHelp and GridSmart is committed to achieving Net Zero on scope 1 and scope 2 emissions by December 2022.

As small unquoted companies with limited resources available. ISHelp and Gridsmart are currently not in a position to accurately record, calculate and report scope 3 emissions. The reporting of which is currently encouraged but voluntary for small unquoted companies.

ISHelp and GridSmart is committed to calculating and reporting scope 3 emissions by January 2027 and achieving Net Zero on scope 1, 2 and 3 emissions by December 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
No Scope 3 emissions reporting	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.00
Scope 2	2.44
Scope 3 (Included Sources)	Not currently reported
Total Emissions	2.44

Current Emissions Reporting

Reporting Year: 2022 (ACTUAL)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.00
Scope 2	2.25
Scope 3 (Included Sources)	Not currently reported
Total Emissions	2.25
Less: Carbon offsetting activities undertaken	(5.00)
Net Emissions	(2.75)

Emissions reduction targets

In order to achieve Net Zero, we have adopted the following carbon reduction targets.

- Utilise national grid energy providers that supply electricity generated from renewable resources.
- Membership to a UK Tree planting scheme to offset CO₂ emissions.

We project that carbon emissions will reach net zero on scope 1 and 2 emissions by December 2022.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes equate to 5 tCO₂e. The measures will be in effect from 15 November 2022.

UK tree planting certificate to offset forecasted emissions in the 2022 calendar year is attached for reference.

In the future we hope to implement further measures such as:

The recording, calculating, and reporting of scope 3 emissions to allow ISHelp and GridSmart to identify further emission reduction activities and engage in an increased level of carbon offsetting schemes where a direct reduction in emission is not achievable.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with UK government guidance and reporting standard for Carbon Reduction Plans.

Scope 1 and Scope 2 emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed:

.....
